Mobile App Technology

We at Expert Apps have developed highly sophisticated App technology driven by artificial intelligence and hi-tech user profiling. Each App is driven by 52,000+ lines of code coupled with highly complex algorithms.

Let's take a look at an example of this growth!

In App Quizzes

We chose to combine gamification with education, as such developed quiz management within our Enterprise Apps, allowing our Enterprise Licence Holders to better serve their customers, clients and prospects by understanding exactly where they are falling short, and helping them to retain the education.

We have also developed a program that automatically manages the App user's accountability, enabling our Licence Holders to be recognised in their industry for producing outstanding results.

The possibilities are endless.

Provoking thought...

How many opportunities are you leaving on the table?

Imagine if you had an insight into the thought process of a prospect that does not buy or engage in any of your programs, or whilst selling from stage or at an event.

What percentage of your prospects are you loosing, how much is this costing you?

Communication with prospects

With email open rates being at the very worst since the beginning of email (average of 17.9%) push notifications are becoming more prominent and engaging. Expert Apps have seen push notification open rates of 30% upwards.

Social Media Saturation

Social media is rapidly reaching over-saturation making it challenging to connect, engage and retain your ideal customer, clients and prospects. Your Enterprise App will give you the tools you to retake control, serve your audience, increase engagement and retention.

Joining Expert Apps is not 'cheap'. It's an investment in yourself or your business.

The fee really isn't the most important figure here, the most important figure is the return you're likely to get on your investment. As long as the return outweighs the investment (and it really should) then it's a smart investment, right?

Over the next 12 months

We will work together as a TEAM.

Our goal is to get you more business clients, fans/followers, ultimately more high-ticket sales – doing all of that in a way that fits with the lifestyle that you really want...

- If you feel you've got a powerful message and heaps of knowledge...
- If you want to become known (or maintain your status) as THE Expert in your industry...
- If you want to fast-track your way to 'Owning the space'...
- If you want to serve your audience in a way that has never been possible before...
- If you are aware of a large proportion of people, that should be working with you but have drifted elsewhere

We will work closely with you and your team to help understand your App users, in a way others only dream of.

Darren Galvin CEO

Darren has always been a computer geek since a young age. His entrepreneurial flair led to him opening his own computer repair shop, IT support and Web Development companies .

When he branched into the world of App Development he soon realised via his clients ROI that he needed to make his own mark on the industry.

Founding CEO of Expert Apps Darren, continues to lead and innovate a world-class app software company enabling businesses and brands to use apps to grow and connect with their users, on a deeper level than ever possible before.

Darren will support you in getting results that others only dream of.

Danny Webster Managing Director

Following 3 years of helping others get massive results through technology, Danny, alongside Darren, founded Expert Apps.

Danny is renowned for his ability to turn ideas into reality, and create seamless products that use AI and automation to achieve results.

Internally, Danny is known as the 'Logic' -The man behind the scenes that keeps the cogs turning and the garden watered.

He's not the 'chatty' type, but he knows a thing or two about tech!

Where do you FIT IN.

We have developed two very different products. Each solving different problems for two completely different types of audiences. Below we have outlined the differences between the two, enabling you to decide. Which one suits you best?

ENTERPRISE™

Enterprise is brand specific. Let's imagine that you are currently running an training organization; You will licence 'Your Company Name' or 'Your Name' - This app is embracing your brand, you are the only influencer inside.

Each user will be presented with different content according to 'funnel stage' or where they are currently working with your business. For example; Free Event Attendees, Mastermind Client, Private Client. You will serve them with tools that assist them on their journey.

This product is perfect for businesses who are wanting to engage and grow their existing community on a much deeper level than ever possible before.

VERTICAL

Vertical is industry specific. Lets imagine your training company is in the field of Dance, You may choose licence 'The Dance App' - This app embraces other experts and influencers, effectively bringing the entire industry together. Each user will have the same experience and have access to the wealth of content inside.

This product is perfect for individuals who are looking to make a stamp on their industry.
